## Wet area use for Marblique Mosaics

Crossville® produces the Marblique mosaics wiproduces the Marblique mosaics with a unpolished finish. The ANSI A326.3 wet Dynamic COF of Marblique is  $\geq .42$ . Their small size ensures frequent grout joints which provides traction and drainage. Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water and poor surface cleaning. This information is provided so that customers may make a realistic and informed decision when comparing Marblique to other tile products in wet area environments, such as residential/ commercial bathrooms, showers, and interior pool decks.
